

The Shoot Template

Fill every block before you write a single prompt. By the time the form is full, the shoot is already designed — generation is the easy part.

The rule. If any block is empty or vague, don't generate yet. Go back. The whole point of this file is to make you do the thinking BEFORE the credits start burning.

SHOOT DELIVERABLE

☐ portrait series ☐ lookbook ☐ UGC set ☐ product launch trio ☐ editorial spread ☐ other:

BLOCK 1

Theme statement

One sentence. Who is this shoot for, what is the deliverable, what is the mood.

Pass test — if you read your theme back and it doesn't tell you what to LOCK, it's too vague. Rewrite.

Polish point

Pick ONE point on the spectrum. That choice tells you what to lock hard and what to leave loose.

- ☐ **Studio** — full polish, every variable controlled
-
- ☐ **Editorial** — pro craft, slightly relaxed
-
- ☐ **Lifestyle** — feels authentic, still styled
-
- ☐ **UGC** — phone-shot register, anti-aesthetic on purpose
-
- ☐ **Documentary** — observed, never staged

WHY THIS POINT — ONE SENTENCE LINKING POLISH TO DELIVERABLE

Locked recipe

Write the master JSON. Every shot in the set pastes this and only swaps the variable slots.

Identity reference F-Sheet / F-PSheet job ID	
Camera + lens e.g. Sony A7R V, 50mm f/2.0	
Color grade real reference — Kodak Portra, cool noir	
Wardrobe family or for products: surface + light family	
Anti-keywords failure modes you've actually seen	

Lock checklist — every box checked before you write the shot table

☐ Identity reference saved as a Higgsfield job ID or uploaded file

☐ Camera + lens written as a complete sentence (not a vibe word)

☐ Color grade specifies a real reference film / look

☐ Wardrobe family is a FAMILY, not a single outfit

☐ Anti-keywords name the failure modes you've actually seen

Shot table

One row per shot. Columns are the slots that *CHANGE*. Same column names as your bucket page.

The same-scene-multiple-angles trick. Allow 2–3 rows at the SAME setting where only the **composition** column changes (wide / profile / hands close-up). You're building a shoot, not a slideshow.

SHOT 1

SETTING	LIGHT	POSE / COMP	WARDROBE / VARIANT
_____	_____	_____	_____

SHOT 2

SETTING	LIGHT	POSE / COMP	WARDROBE / VARIANT
_____	_____	_____	_____

SHOT 2B

same scene · new angle

SETTING	LIGHT	POSE / COMP	WARDROBE / VARIANT
_____	_____	_____	_____

SHOT 2C

same scene · new angle

SETTING	LIGHT	POSE / COMP	WARDROBE / VARIANT
_____	_____	_____	_____

SHOT 3

SETTING	LIGHT	POSE / COMP	WARDROBE / VARIANT
_____	_____	_____	_____

SHOT 4			
SETTING	LIGHT	POSE / COMP	WARDROBE / VARIANT
_____	_____	_____	_____

SHOT 5			
SETTING	LIGHT	POSE / COMP	WARDROBE / VARIANT
_____	_____	_____	_____

Add more shots below as needed. Aim for at least one scene with 2–3 angles.

BLOCK 5

Generate & track

One row per generation. If any check fails, regen that row only — the recipe stays.

#	IDENTITY ✓	GRADE ✓	SLOTS ✓	APPROVED / REGEN
1	☐	☐	☐	_____
2	☐	☐	☐	_____
2b	☐	☐	☐	_____
2c	☐	☐	☐	_____
3	☐	☐	☐	_____
4	☐	☐	☐	_____
5	☐	☐	☐	_____

Credits estimate: ~ _____ per shot × _____ shots = _____ total credits

Ship / no-ship pass

Run through this with the full grid in front of you. If any answer is NO, the set isn't done.

Coherence — the locked half held

same person/product, same grade, same lens family, same wardrobe lane

- ☐ Does the same person/product appear in every shot?

- ☐ Does every shot share the same color grade — same blacks, warmth, skin tone?

- ☐ Does the lens choice feel consistent — no wide-angle next to a long-portrait?

- ☐ Has the wardrobe / surface family stayed inside its lane?

Variety — the variable half worked

earn the scroll, build a sequence, prove the same-scene-different-angle move

- ☐ Does each shot earn its place — different setting, light, or composition?

- ☐ Are at least 2 shots same-scene-different-angle, not just N different scenes?

- ☐ Does the set read as a sequence — opener, middles, closer?

The ship test

- ☐ Could a client paste this grid into a deck and call it a campaign?

- ☐ Would you be proud to caption it with your name?

Lessons learned

Anything that surprised you, broke, or worked unexpectedly well. Write it now while it's fresh.

Done?

The set is shippable. Move it into the Creative Ads pipeline (add overlay + caption + paid-ad version) — see the Creative Ads page in the Frameworks classroom.

Stuck?

Open the corresponding bucket page (Model Shoots / Product Shoots) and find an entry whose theme matches yours. Steal its recipe.
